QuadToneRIP Install Notes for macOS Security & Privacy Issue

The MacOS has Security in place that can make it more difficult to install third-party software.

It is fairly simple to workaround the security constraints:

- 1) Run the "System Preferences ..." command from the Apple Menu at top left of screen.
- 2) Select "Security & Privacy" Pane -- it should look like the following:

Gene	eral FileVault Firewall Prin	vacy
A login password has bee	en set for this user Change Par	ssword
🗹 Require password	15 minutes 📀 after sleep or	screen saver begins
Show a message v	when the screen is locked Set L	ock Message
 Disable automatic 	login	
Allow apps downloaded fr	rom:	
Allow apps downloaded fr	rom:	
Allow apps downloaded fr	rom:	
Allow apps downloaded fr App Store App Store and ide	rom: entified developers	
Allow apps downloaded fr App Store App Store and ide	rom: entified developers	
Allow apps downloaded fr App Store App Store and ide	rom: entified developers	
Allow apps downloaded fr App Store App Store and ide	rom: entified developers	
Allow apps downloaded fr App Store App Store and ide	rom: entified developers	
Allow apps downloaded fr App Store App Store and ide	rom: entified developers	
Allow apps downloaded fr App Store App Store and ide	rom: entified developers	

3) The main issue is to enable downloads from "App Store and Developers". Older OS's may also show an "Anywhere" option. If you need to make any changes you will need to Unlock the screen at the bottom left of page. This will ask for the admin password of your computer. Keep this window open.

4) Now when you try to run the Install Package (.pkg file) you will get a message like the following:

5) At the same time the Security & Privacy window will give a message like the following:

A login password has b	een set for this user Change Password	
🗹 Require passwo	rd 15 minutes 这 after sleep or screen sa	ver begins
Show a messag	e when the screen is locked Set Lock Mess	age
Allow apps downloaded	d from:	
Allow apps downloaded	d from:	
Allow apps downloaded App Store App Store and i	d from: dentified developers	
Allow apps downloaded App Store App Store and i "Install-QTR-2.7.9.pkg" from an identified deve	d from: dentified developers / was blocked from opening because it is not loper.	Open Anyway
Allow apps downloaded App Store App Store and i "Install-QTR-2.7.9.pkg" from an identified deve	d from: dentified developers / was blocked from opening because it is not loper.	Open Anyway
Allow apps downloaded App Store App Store and i "Install-QTR-2.7.9.pkg" from an identified deve	d from: dentified developers ' was blocked from opening because it is not loper.	Open Anyway
Allow apps downloaded App Store App Store and i "Install-QTR-2.7.9.pkg" from an identified deve	d from: dentified developers 7 was blocked from opening because it is not loper.	Open Anyway

6) You can now hit the "Open Anyway" button to install the package.
